

GPS+

**BECAUSE ORDINARY GPS
ISN'T GOOD ENOUGH**

A large, curved horizon of the Earth, showing the blue and white colors of the planet's surface, occupies the bottom half of the page.

**A SIMPLE GUIDE TO
UNDERSTANDING GPS
AND WHY TOPCON
GPS+ PROVIDES A
BETTER SOLUTION**

There's a lot of buzz about GPS today. It's in a lot of cars, on most boats, and now it's even made its way onto bulldozers and motor graders as part of a Topcon's 3D-GPS+ stakeless, automatic grading system.

With any new development of this magnitude, there are always questions that need answered. This booklet is written to help answer a common and very basic question—what is GPS?

Because once you understand GPS and its limitations, you'll know why Topcon GPS+ is becoming the standard for the high precision, high productivity needs of surveyor and contractors.
