TOPCON

GRADE MANAGEMENT SYSTEM FOR THE GRADE CHECKER

**Now Supports
Topcon
Total Stations**

**MILLIMETER
GPS
COMPATIBLE**

Pocket 3D construction software is at the heart of Topcon's GPS (RTK) Grade Management System.

- CHECK GRADE & VERIFY CUT/FILL ANYWHERE AND EVERYWHERE!
- SET GRADE STAKES
- VOLUME QUANTITIES - MEASURE AND COMPARE SURFACES.
- MEASURE AND STORE AS-BUILTS
- INDUSTRY'S EASIEST TO USE INTERFACE
- INTERNAL BLUETOOTH™ WIRELESS TECHNOLOGY

Topcon's GPS+ technology is changing the way grade checking, staking and excavation gets done. By simply adding our Grade Management System to their business, contractors take more control over their entire jobsite. Pocket 3D puts the power of GPS+ based site management in the hands of site foreman and grade checkers making it easy for them to verify grades, reset stakes or locate any area on the site.

With Pocket 3D, contractors can measure their productivity on a monthly, weekly or even daily basis to make sure they are staying on schedule. This information provides contractors a tool for maximizing equipment utilization. What a great way to get the most out of your biggest investment.

The primary components of our Grade Management System are two GR-3 GNSS receivers and an FC-100 field controller loaded with Pocket 3D Construction software.

Finally, a powerful jobsite management tool made for contractors and the way they work. Topcon's Pocket-3D Grade Management solution brings GPS down to earth.
